DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in the reply filed on 5/1/07 is acknowledged. The traversal is on the ground(s) that Group II is improperly classified. This is not found persuasive because the process as claimed could be used to make another materially different product, such as a metal oxide other than titanium dioxide, and only one-way distinction is required in this case.

The requirement is still deemed proper and is therefore made FINAL.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1-14 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-14 of prior U.S. Patent No. 6,689,716. This is a double patenting rejection. Claims 1-14

would be inherently catalytic in view of claims 2-14 and the specification, which defines them.

Response to Arguments

4. Applicant's arguments filed 10/15/07 have been fully considered but they are not persuasive.

It is argued that claims 1-14 were rejected... 6,689,716. This is not persuasive because the proper rejection is not one of "domination" as Applicant asserts, since Claims 1-14 would be inherently catalytic in view of claims 2-14 and the specification, which defines them. Applicant cites the example of chlorine and halogens. However, there are clear examples of other halogens that are not chlorine. There are no such clear "non-catalytic" examples analogous to the instant claims, nor does Applicant provide any argument to the contrary. Thus, the rejection is proper.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
